
# Knowing your cancer risk can help you prevent it.

## Check your risk.

Take the ACS **CancerRisk360™** assessment. In about 5 minutes, get personalized insights on daily choices, family genetics, and screenings.

## Know your risk.

Understand factors that impact your cancer risk and talk to a doctor to get the whole picture.

## Reduce your risk.

Make meaningful changes — big or small — to improve your overall health. We're here to support you every step of the way!
